## **IMPORTANT NOTE:**

'PASSIVE' and 'AGGRESSIVE' order values for classes of instrument noted above are not considered to be applicable due to the market structure for this class of instrument which is primarily based upon a 'request-for-quote' model rather than the 'order book' model more common in other classes of instrument, consequently values are not reported.

### **Information on the quality of execution**

The following information is provided in accordance with the requirements of Article 3(3) of RTS 28 and summarises the analysis and conclusions drawn from the monitoring of the quality of execution obtained through the brokers used by 1167 in 2018.

#### ***(a) An explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;***

In the light of our business, the primary execution factors which influence execution on a trade by trade basis are:

- The likelihood and speed of execution. When decisions are taken to buy or sell, the primary desire is to implement those purchases or sales without delay. The importance of this factor will be increased in respect of less liquid investments. Orders will thus normally be executed on an “aggressive” basis where appropriate; and
- Price. Whilst the desire to execute is strong, it is tempered by the need to execute at a reasonable price. If we consider the size of the trade we are trying to execute as material to the prevailing trading volume for example in less liquid instruments, we may place a limit order with a broker. However, most of our dealing is on a request for quote basis which is the standard approach in our over-the counter asset classes.

In practice, a number of the execution factors are subject to initial pre-assessment and subsequent ongoing monitoring and review:

- The costs related to execution are within the price or pre-agreed with the broker and not subject to variation or negotiation on a trade by trade basis. Whilst cost is important and excess cost will represent a performance drag, market volatility is such that the ability to execute will likely outweigh pure cost;
- The speed of settlement is not normally an issue as settlement is subject to standard market convention; and
- The likelihood of timely settlement is one of the factors in the initial selection and ongoing monitoring of counterparties and will not be a factor on a trade by trade basis.

#### ***(b) A description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;***

1167 does not have any close links, conflicts of interests or common ownerships with any trading venue. 1167 executes FX, FX Forwards and Non-Deliverable Forwards with Northern Trust Company whose subsidiaries provide administration and depositary services to 1167 Active Funds ICAV, 1167's sole client. All deals are undertaken on an arm's length basis.

***(c) A description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;***

1167 does not receive any payments, discounts, rebates or non-monetary benefits (other than occasional low value hospitality) from the counterparties.

***(d) An explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;***

1167 added the following venues for operational efficiency. Their inclusion did not effect the list of underlying counterparties.

**FX Connect** - FX Forwards, Non-Deliverable Forwards

**Bloomberg Multilateral Trading Facility (BMTF)** - Cash Bonds, Credit Linked Notes

***(e) An explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;***

Not applicable as 1167 has a single professional client.

***(f) An explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;***

Not applicable, 1167 does not provide investment services to Retail clients.

***(g) An explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under Delegated Regulation (EU) 2017/575;***

Throughout 2018, and in accordance with the best execution obligation under Article 27 of MiFID II, 1167 measured the performance of client orders.

1167 has made limited use of data published under Delegated Regulation (EU) 2017/575 ('RTS 27') by execution venues and continued to rely upon its execution performance.

***(h) Where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.***

1167 did not use a consolidated tape provider established under Article 65 of Directive 2014/65/EU in 2018.
